PRESS RELEASE

Divgi TorqTransfer Systems Limited receipt of Exclusive order from key OEM customer, Mahindra & Mahindra Limited for transfer case business

Pune, February 11, 2026 : Divgi TorqTransfer Systems Limited, a leader in automotive drivetrain components and systems, is pleased to announce that it has received exclusive order confirmation for its transfer case business from its key OEM customer, Mahindra & Mahindra Limited.

Mahindra & Mahindra has secured a major export programme involving the delivery of 35,000 units of the Scorpio Pik-Up in CY 2026 to Indonesia, supporting a nationwide initiative aimed at strengthening rural logistics and agricultural supply chain. As part of this programme, Divgi TorqTransfer Systems Limited will act as the sole supplier of 4x4 transfer case systems for the Scorpio Pik-Up platform for the Indonesian market.

The order comprises a total volume of approximately 35,000 units, with production and deliveries scheduled to commence in CY26. The Scorpio Pik-Up vehicles are designed to operate across demanding terrain conditions and play a crucial role in enabling efficient transportation of goods across rural and agricultural ecosystems. This development represents a key milestone in the Company's strategy of supporting domestic OEM customers in their global expansion initiatives and international vehicle programmes.

Commenting on this achievement, Mr. Jitendra Divgi, Managing Director, Divgi TorqTransfer Systems Limited said:

"We are pleased to announce that the Company has secured an exclusive order from our key OEM customer, Mahindra & Mahindra Limited for its Indonesia export programme. Under this contract, DTTS will be the sole supplier of 4x4 transfer case systems for the Scorpio Pik-Up platform. This win further strengthens our long-standing partnership with M&M Ltd. and underscores their continued confidence in our engineering and manufacturing capabilities.

The programme is expected to commence in CY2026. This milestone reinforces our leadership position in the transfer case segment, where we are among the global leaders and the only domestic player. It also reflects our growing participation in global vehicle platforms and export-led programmes.

The incremental volumes will be serviced through our existing manufacturing facilities, which have sufficient capacity headroom, enabling efficient execution without any major incremental capital expenditure.

This order is expected to support volume growth and aligns well with our strategic focus on partnering with OEMs on their global expansion and international programmes. We remain confident that this collaboration with M&M Ltd. will continue to deepen as we work together on future growth opportunities."

About Divgi TorqTransfer Systems Limited:
